CAREER OBJECTIVE

Highly motivated B.Tech Artificial Intelligence and Data Science Aspirant with a strong foundation in Python, Machine Learning, Generative AI, and Full-Stack Web Development. Passionate about building intelligent software solutions that solve real-world problems through applied AI. Seeking an entry-level opportunity to apply technical knowledge, strengthen problem-solving skills, and contribute to organizational growth.

EDUCATION

RVS College of Engineering and Technology, Coimbatore	2027
B.Tech - Artificial Intelligence and Data Science	CGPA:8.1
Srivalli Varadaraj Matric Hr Sec School	2023
HSC	Percentage:78
Srivalli Varadaraj Matric Hr Sec School	2021
SSLC	

TECHNICAL SKILLS

- Programming Languages: Python
- Artificial Intelligence: Machine Learning, Generative AI,scikit learn,numpy
- Web Development: HTML, CSS, JavaScript, Flask
- Databases: MySQL, MongoDB
- Tools: VS Code, Git, GitHub, Jupyter Notebook
- AI Tools: ChatGPT, Claude AI, Google Gemini, Groq

PROJECTS

AI-Based Disease Prediction and Medical Assistant

Python, Flask, Machine Learning, Groq LLM, HTML, CSS, JavaScript, MySQL

- Developed a machine learning-based disease prediction system that analyzes user-provided symptoms and classifies probable diseases using a trained symptom dataset.
- Built a Flask-based web application with an interactive interface that enables users to enter symptoms and receive predicted conditions along with relevant precautionary measures.
- Integrated a Groq LLM-powered AI chatbot to handle follow-up healthcare queries, providing medicine descriptions, dosage information, precautions, and general healthcare guidance in real time.
- Implemented MySQL database integration to store user queries, disease prediction history, and chatbot interactions, enabling structured record management and future reference.

College Complaint Priority System

Python, Flask, Machine Learning, HTML, CSS, JavaScript, MySQL

- Developed a Flask-based complaint management platform that accepts student complaints through a web interface and automatically classifies their urgency using a Machine Learning model.
- Designed and implemented a MySQL database to manage complaint details, categories, priority levels, and status history, enabling efficient data retrieval and reporting.
- Built an admin dashboard to filter, prioritize, and update complaints based on urgency and status, reducing the need for manual complaint sorting.

- Implemented end-to-end complaint tracking that allows students to monitor status updates from submission through resolution, improving transparency in the complaint-handling process.

INTERNSHIP

Artificial Intelligence Intern — One Yes Infotech, Chennai

- Developed an AI-based disease prediction system using Python and Machine Learning, processing symptom-based datasets to predict probable diseases.
- Performed data preprocessing, model training, and performance evaluation to build and validate the disease prediction model as part of the internship project.
- Integrated Generative AI and Large Language Model concepts using Groq LLM to develop an AI-powered medical assistant for follow-up queries, medicine descriptions, precautions, and general healthcare guidance.
- Implemented the AI application using Flask and MySQL, connecting the trained Machine Learning model and AI assistant with a web-based interface for user interaction.

Full Stack Development Intern — Elysium Private Limited, Coimbatore

- Developed an e-commerce website using HTML, CSS, and JavaScript, creating responsive and user-friendly web pages for product browsing and interaction.
- Implemented backend functionality using Flask, including routing, API development, and integration of web application components.
- Integrated MySQL and MongoDB for storing and managing product and application data, connecting databases with the web application.
- Worked on the complete full-stack development workflow, including frontend development, backend integration, database connectivity, testing, and deployment of the e-commerce application.

CERTIFICATIONS

- Google AI Essentials - Google (Coursera)
- ChatGPT for Advanced Data Analysis - Vanderbilt University (Coursera)
- Generative AI - Microsoft
- Python Course Completion - Cybernaut
- Web Development using Vibecode - Sparked Academy (Workshop)

SOFT SKILLS

- Communication
- Problem Solving
- Teamwork & Collaboration
- Adaptability
- Time Management
- Quick Learning

AREA OF INTEREST

- Artificial Intelligence & Machine Learning Engineer
- Generative AI
- Software Engineer
